FACULTY FEEDBACK MANAGEMENT SYSTEM

SCENARIO: Submit Feedback and View Feedback Report

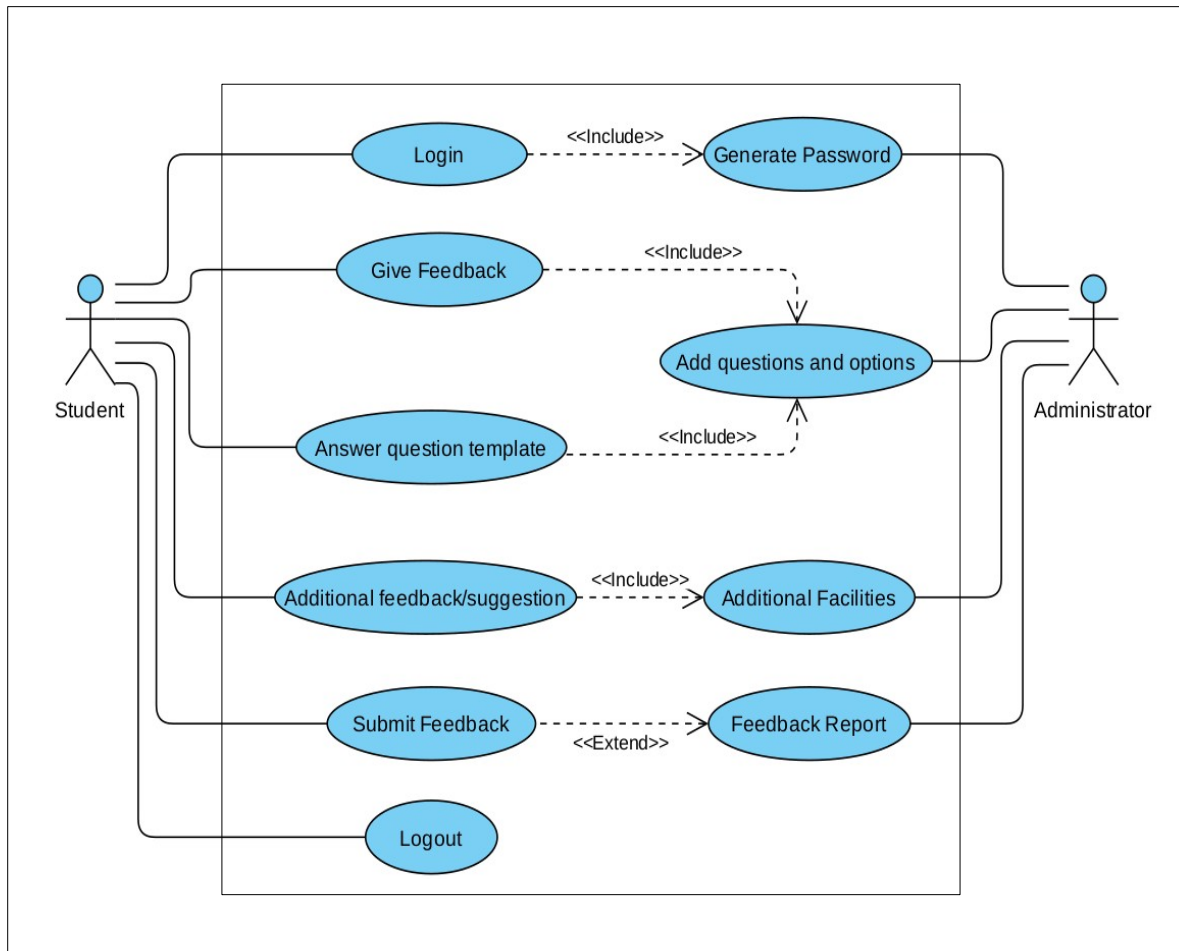

Fig: Submit Feedback and View Feedback Report

Name: Faculty Feedback Management System (Submit Feedback and View Feedback Report)

Identifier: FMUC03

Description:

The use case shows how a student can submit his/her feedback for the respective subject and lab teachers/facilites, library and sports facilities, etc. First, the student needs to login to the system by using the provided ID and password (generated by the password generation module). After login, the student will be able to view his/her profile along with details of the course they are pursuing. Students will be able to give feedback more intuitively and surf through on their dashboard. Where dashboard will contain details and feedback questions related to all teachers assigned to respective students. Along with academic facilities, other feedback questions related to facilities of library, sports, SIGs, canteen, etc. will be submitted by students.

Goal:

1. To submit the feedback of students for various academic and no-academic facilities provided.

2. To view, download and analyze the feedback report in any preferred format only by the administrator.

Precondition:

The student should take note of his/her login credentials provided before giving feedback (generated by the password generation module).

Frequency:

The submission of feedback by students has to be done twice throughout the semester.

Basic Course:

The use case begins when:

1. The student logs in to the feedback portal.

2. Submits his/her feedback.

The use case ends when:

The administrator views and analyzes the feedback report.

Alternate course A: Student is not marked eligible for the submission of feedback by the administrator in case of low attendance than specified criteria for a particular subject/lab.

Solution 1: Contact the administrator (if any genuine reason for low attendance and allowed by CC and Mentor).

Postconditions:

1. Students will be made eligible after the fulfillment of the minimum requirement of attendance for that particular subject/lab.

2. Students can submit feedback.

Actors:

1. Students

2. The administrator

Included use cases:

1. Data Entry

2. Password Generation
